

Francisco Teigas Ferra Inácio, PhD

Vancouver, BC — francisco@drcisco.com — www.drcisco.com — linkedin.com/in/franciscoinacio

Summary

Technical leader and entrepreneur with a PhD in computer science and 10+ years in game engines, blockchain, and product leadership. Proven track record delivering cross-disciplinary projects in gaming and Web3, with expertise in rendering, C++/Rust, smart contracts, and product strategy. Skilled at leading international teams, setting roadmaps, and aligning engineering with business goals.

Experience

Lead Engineer – Offworld Industries (Squad 44, Fireteam) 2024–Present

- Helped create development pipeline post-acquisition: CI/CD, crash reporting, data validation, Steam packaging.
- Defined and executed product roadmap aimed at improving player retention and accessibility.
- Acted as project manager and product owner for a globally distributed part-time team, introducing agile workflows, coaching team on JIRA and sprint planning, and aligning stakeholders on delivery goals.

Strategic Consultant – Persistence 2024

- Diagnosed and resolved communication breakdown between strategy and development teams.
- Established sprint process, epics breakdown, and delivery accountability framework.

CTO & Co-Founder – Cryptech (Neptune Finance, Denom) 2021–2023

- Led architecture and product development for a Neptune and Denom.
- Built Rust-based smart contracts on CosmWasm and contributed to interchain communication tooling.
- Drove technical hiring, investor engagement, and long-term product vision.

Senior/Lead Engineer – Offworld Industries (Squad) 2018–2021

- Led core tech initiatives, including networked ragdolls, dragging, projectiles, and other UE4 gameplay systems.
- Facilitated roadmap planning and coordinated post-launch feature rollout and patch cycles.
- Managed a team of 9 engineers of different levels and ran sprint planning sessions.

Software Engineer – Ososim 2017–2018

- Contributed to animation and rendering tech.
- Briefly stepped into interim CTO role.

Engine/Render Programmer – Frontier Developments 2015–2017

- Shipped rendering work for Elite Dangerous, Planet Coaster, and Jurassic World Evolution.
- Implemented DX12 support, cross-platform engine improvements, and memory/resource optimizations.

Education

PhD in Interactive Computer Graphics – University of Hull, UK 2012–2017
SIGGRAPH 2015: Reducing Geometry-Processing Overhead for Novel Viewpoint Creation

MSc in Games Programming – University of Hull, UK 2011–2012
Distinction

BSc in Computer Science – NOVA University of Lisbon, Portugal 2008–2011
Grade: 16/20

Technical Skills

Languages: C++, Rust, Python, C, Java, GLSL, HLSL, Typescript	Focus Areas: Game engines, rendering, smart contracts, product strategy
Frameworks: Unreal Engine 4, CosmWasm, OpenGL, DirectX12	Platforms: PC, Xbox One, PS4, macOS, Linux
Tools: Git, P4, TeamCity, JIRA, Notion, Trello, Linear	Languages: English (fluent), Portuguese (fluent), Spanish (fluent), French (basic)
